The big show—Fingling Bros. and Barnum & Bailey—moving on four long railroad trains and carrying 1600 people, 50 elephants, 1000 menagerie animals, hundreds of horses and Gargantua the Great, the world's largest and most ferocious captive gorilla, will appear at Lethbridge on Wednesday afternoon next, for just one performance, starting at 2.15.

NOVA SCOTIA'S PREMIER BOOTS LIFE INSURANCE

In a recent address, Mr. Hon. Angus L. Macdonald, premier of Nova Scotia, paid the following tribute to Life Insurance:

"When one reflects that the Life Insurance companies in this country have assets which total more than two and one-half billions of dollars; that the policies in force amount to some six or seven billions, and that you number three and one-half million Canadians among your policyholders, he will understand what an important part life insurance plays in the economic and financial life of this Dominion."

"In a country which believes in British tradition, let us remember that one of the proudest of British traditions is that of honest dealing between men, of fair representation, of the sanctity of the pledged word."

"The record of the Canadian life insurance companies in this country is one of a solid road of truth and honesty, an example and inspiration to all men in this country of goodwill and honor. . . ."

ENOCH WILLIAMS NOMINATED BY LABOR

At a largely attended meeting in Bellevue on Wednesday night, Enoch Williams, mayor of Blairstown, was nominated as straight Labor candidate to contest the Pincher Creek-Crows' Nest Pass provincial constituency in the next election.

A campaign committee was formed as follows: John Lloyd, M. Stigler, Coleman; John Packer, R. Horne, E. Peressini, C. Shaw and Dominic Campano, Blairstown; J. Poch, Frank; J. Dugdale, W. Ostrenski and J. Price, Bellevue; George Iwasuik and Jos Stubb, Hillcrest; A. Wallender, Beaver Mines; M. Chutskoff, Pincher Creek.

COPPER WIRE THEFT UNCOVERED

Two men who did the Paul Bunyan theft of two and a half tons of copper wire from the East Kootenay Power Company last May are behind the bars, having at Cranbrook last week pleaded guilty. The East Kootenay Power Co. had purchased the wire, a heavy gauge transmission line between Moyie and Kimberley; from the Consolidated Co. The wire was taken down and wound on nine large wooden reels. Then the wire disappeared one night as though a man of Paul Bunyan's stature had picked it up and walked away without even leaving a footprint. Police worked cautiously on the case and found that the nine spools were hauled away on a truck to a secluded spot, and there unwound and rewound in small coils. After this, these coils were slightly burned to give the wire the appearance of having been discarded as scrap copper. This material was then taken to Edmonton and there sold to a junk dealer who apparently had no suspicion the stuff had been stolen.

In ferreting out the case, suspicion pointed to two men, both of Kimberley, William Karl Henry and Alfred Leo Rivet, who were arrested. Both pleaded guilty and were sentenced to thirteen months imprisonment. The value of the wire in its original condition was about \$1,000. The junk dealer is said to have paid \$250 for it.

Regulations governing the licenses of trailers have been suspended, according to word from Edmonton. Negotiations are pending for an agreement between railways and oil companies which may have a far-reaching effect on highway transportation," states Hon. W. A. Fallow. Nothing further will be done in the matter until the whole situation has been reviewed to determine what the changes will involve.

INDEPENDENT ELECTORS ASSOCIATION FORMED

An organization known as the Independent Electors Association of the Pincher Creek-Crows' Nest Pass constituency was formed at a well attended meeting in Lundbreck community hall on Thursday night last. Polls were represented on the basis of one for every 100 votes at the last election. Permanent officers are as follows:

Honorary presidents—R. O. Allison, E. G. Cooke, H. Bossenberry and G. E. Cruckshank.

President—R. E. Donkin, Frank. Vice-Presidents—John Kerr, Passmore, and N. Nicholson, North Fork. Executive committee—G. Patterson, Coleman; S. G. Bannan, Blairstown; Walter Warn, Bellevue; H. A. McVicar, Hillcrest; W. Kerr, Passmore; John Angus, here. The latter proceeded to Drumheller on Wednesday to look after funeral arrangements.

Funeral takes place this afternoon, and the remains will be laid to rest in the Drumheller union cemetery.

NO MORE HOMESTEADING

The era of homesteading in Alberta is gone, provisions of the 1939 Lands Act having gone into effect on August 2nd. From this time on, settlers will lease government lands for a term of twenty years, which is renewable for another twenty years. No rent will be paid for the three years immediately following the granting of a lease. Thereafter there will be payable one-eighth of the crop grown, with the exception of years in which the average yield is less than five bushels to the acre. The government will pay one-half of the moneys received to the municipality in which the land is situated, and the municipality will pro-rate the moneys among the various taxing authorities. Any person who does not own land, who is 18 or over and a British subject, or intends to become one, may apply for a lease at a fee of \$5.

BICYCLE CENTENARY CELE- BRATIONS IN SEPTEMBER

The direct ancestor of Canada's 200,000 bicycles is being commemorated by the unveiling in September of a plaque to mark the hundredth anniversary of the invention of the first bicycle to be propelled by pedals.

The inventor was Kirkpatrick Macmillan, a Scottish blacksmith, and he was 29 years old when he mounted his bicycle and rode off to Glasgow to see his three brothers, one of whom, a former tutor of John Bright's, was rector at Glasgow high school.

"I met a man flein' through the air on wheels," cried a shoemaker, when he encountered the first bicycle in action, "and if it wasn't man, then it must ha' been the De'il himself!"

The plaque is to be placed on the wall of Kirkpatrick Macmillan's smithy at Court Hill in Dumfrieshire.

It is estimated by the British cycle union that in the world today there are 61,000,000 descendants of this first bicycle. Last year Great Britain sent 376,468 abroad, of which total 166,166 were sold to foreign countries, a record figure representing in value £486,306.

In looking over back files of three years ago, we noticed an advertisement that appeared, inviting citizens of Alberta to sign up for their dividends. This looks like the crime of fishing in a closed stream . . . but there was no fine for the offence.—Clarkeholm Local Press.

FORMER BLAIRMOREITE PASSES IN DRUMHELLER

Word was received here on Wednesday morning of the death of Roderick Macdonald, brother of our esteemed citizen, John Angus Macdonald, which occurred in a Drumheller hospital following a very brief illness.

Macdonald was born in Cape Breton some fifty-seven years ago, and came west when quite a young man, taking up residence in Blairstown, where for a number of years he took an active part in labor union activities, during part of which time he held an official position with the local union. For some years past he has conducted an hotel at Rowley, Alberta, and was proprietor of same at the time of his death. He was unmarried. He is survived by one sister in Boston, a brother in Vancouver and his brother, John Angus, here. The latter proceeded to Drumheller on Wednesday to look after funeral arrangements.

Funeral takes place this afternoon, and the remains will be laid to rest in the Drumheller union cemetery.

HILLCREST MINERS'

ANNUAL PICNIC

The Hillcrest miners and their families held their annual picnic on Saturday last, which was much enjoyed. A general programme of sports was carried out. Winners in the various events were, as follows, in order of merit:

25-Yard dash, girls to four years—B. Marks, A. Gurukshi, M. Tabor. 25-Yard dash, boys to four years—Firestones, E. McNeil, B. Dochtery. 50-Yard dash, girls 5 to 6—F. Brown, E. Gardner, B. Marks. 50-Yard dash, boys 5 to 6—Firestone, Lulu, White. 50-Yard dash, girls 7 to 8—McNeil, Fry, Low.

50-Yard dash, boys 7 to 8—C. L. Lazk, Kostuk, S. Tabor.

50-Yard dash, girls 9 to 10—Semancek, H. Gregory, Albozetti.

75-Yard dash, boys 9 to 10—J. Bain, Albozetti, Bozetti.

75-Yard dash, girls 11 to 12—J. Haggarty, B. Fry, M. Frolack.

75-Yard dash, boys 11 to 12—L. Oliniek, J. Price, M. McNeil.

100-Yard dash, girls 13 to 14—R. McDade, A. Colissimo, J. Sarkeys.

100-Yard dash, boys 13 to 14—J. Hutchinson, Olinek, W. Chan and J. Semancek, tied.

100-Yard dash, boys 15 to 16—R. Pozi, J. Chan, P. Norton.

100-Yard dash, girls 15 to 16—S. Hagarty, O. Terlikci, S. McDougall.

Egg and spoon race, girls up to 8 years—B. White, C. Ransaw, F. Frolack.

Three-legged race, boys up to 11—J. Bain-Oliniek, McNeil-P. Panchaisson, J. McNeil-G. McDade.

100-Yard three-legged race, boys up to 16—P. Norton-H. Terlikci, A. Grandio-J. Lulin, Olinek-Semancek.

Egg and spoon race, girls up to 16—J. Berz, C. Smith, B. McDade.

Novelty race, girls to 14—J. Haggarty, E. Frolak, H. Gregory.

Novelty race, boys to 14—R. Rossi, J. McNeil, M. McNeil.

Thread and needle race, girls to 16—S. McDougall, Lazarek, J. Kyle.

Sack race, boys to 16—G. McDade, A. Grandio, J. Bain.

Sack race, boys to 10—R. Brown, J. Wens, J. Bain.

Sack race, boys to 16, 100 yards—G. McDade, A. Grandio, H. Terlikci.

100-Yards young ladies' race—S. Haggarty, O. Terlikci, S. McDougall.

75-Yard married ladies' race—Mrs. J. Eich, Mrs. S. Tabor, Mrs. Green.

Half-mile open—V. Pozi, D. Kuncky, P. Fry.

Old men's race—A. Penman, P. Haggarty, R. Turner.

Mariad women's novelty race—Mrs. J. Eich, Mrs. S. Tabor, Mrs. Smith.

In looking over back files of three years ago, we noticed an advertisement that appeared, inviting citizens of Alberta to sign up for their dividends. This looks like the crime of fishing in a closed stream . . . but there was no fine for the offence.—Clarkeholm Local Press.

HILLCREST HAPPENINGS

Mr. and Mrs. Crichton and daughter Peggy, accompanied by Mr. and Mrs. Massey and son, of London, England, motored to Fernie last week. Mr. and Mrs. Edlund, of Creston, are visiting at the home of Mr. and Mrs. Hamaluk. Mrs. Edlund was formerly Miss Gwen Hamaluk.

Miss Molly Penn is visiting here.

Born on Wednesday and a son.

Miss Peggy Crichton returned home from Victoria, B.C., on Sunday last.

Miss Ellen Smith returned home last week from a short visit to Idaho and other U. S. points.

W. Fisher, R. Lazarenko, W. Carpenter and J. Semancek made a fishing expedition up the Elk last week. Lazarenko brought home a 15-pound bull trout, and Semancek a 13½ pounder.

The local tennis courts are being repaired under the direction of the Girl Guides.

Born, on Wednesday last, to Mr. and Mrs. J. Makin, a son.

BELLEVUE HAPPENINGS

Summer school being over, the following young people are visiting their parents here: Misses Isa Pennan and Erna Boguski, Messrs. Frank Sisco, Luther Goodwin, Alfred Price, Frank Turner and Joe Morris.

Mr. and Mrs. C. W. Johnson and Marion left Sunday last on a two weeks' vacation.

Mr. and Mrs. S. Fidano and Nice, accompanied by Miss Telca Favore, returned Friday evening from a three weeks' holiday spent in the U. S. and Canadian coastal points.

Mr. and Mrs. James Tutt were visitors to Stavely on Sunday.

Mr. and Mrs. J. L. Cousens and Mr. Johnson returned Friday from a two weeks' holiday.

The three-day carnival held Friday, Saturday and Monday in the arena, was very well attended. The frigidarium drawn for on Saturday evening was won by Mrs. A. Wells.

Mr. and Mrs. A. Coupland and Georgie, accompanied by Mr. and Mrs. J. Buchan, left Sunday on a two weeks' holiday.

Miss McLean, of Lethbridge, spent a few days visiting at the home of Mrs. William Alexander.

Mr. and Mrs. J. Tucker were weekend visitors to Waterton.

C. W. Ray, J. Knowles, R. Mole, Master Cary Ward, Miss G. Knowles and I. Ward, were Logan Pass visitors on Sunday.

About sixteen extra men were started at the local mine on Monday morning.

Mr. and Mrs. G. Barnett returned on Saturday from a two weeks' vacation.

Mrs. G. Mattson and children returned over the weekend from a several weeks' visit to High River.

CHURCH OF THE NAZARENE

Near the Depot, Coleman

Pastor: Rev. Leonard Falk, B.A.

Assistant: Miss Dorothy Thompson.

Services: Sunday school at 11 a.m.

Morning worship at 12 noon. Street meeting at 6.30 p.m., in front of Coleman hotel. Evangelistic service at 7.30 p.m.

Tuesday, 7.30 p.m., Bible study.

Friday, 7.30 p.m., Prayer meeting.

Every second Friday at 3 p.m., the junior missionary society meets.

CENTRAL UNITED CHURCH BLAIRMORE

Rev. E. B. Arrol, B.A., Minister

Sunday services—

11.00 a.m., Senior school.

2.00 p.m., Junior school.

7.30 p.m., Public Worship.

Wednesday, 8 p.m., Prayer service.

Assistant: Miss Dorothy Thompson.

Services: Sunday school at 11 a.m.

Morning worship at 12 noon. Street meeting at 6.30 p.m., in front of Coleman hotel. Evangelistic service at 7.30 p.m.

Tuesday, 7.30 p.m., Bible study.

Friday, 7.30 p.m., Prayer meeting.

Every second Friday at 3 p.m., the junior missionary society meets.

Five thousand years before the Christian era, the Egyptian peasant, as he watched each year for the happening of the great miracle, the rising of the Nile, noticed that its gracious waters began to trickle over his parched land just at the time that a certain glorious star appeared above the horizon. And so inevitably did the rising of the star follow upon the rising of the Nile, that to the peasant, the star's faithfulness could only be compared to the faithfulness of his dog, and thus Sirius came to be called the Dog Star.

An American magazine, published by the Society for the Prevention of Cruelty to Animals, publishes the following as part of a hospital report:

Entries: 9 horses, 8 mules, 49 donkeys. Exits: 3 horses, 8 mules, 41 donkeys. Outpatients treated: 120 horses, 57 mules, 141 donkeys, 2 dogs, 1 cat. Other Fondouks visited: 70, all native Fondouks. Superintendent reported: 161 cases investigated, 3,230 animals seen, 312 animals treated, 22 animals hospitalized, 6 pack-saddles (infected) destroyed. 37 Arab bits destroyed, 10 animals transported in motor ambulances and 9 animals sent to the police department. Also sent four donkeys to hospital.

WORLD HAPPENINGS
BRIEFLY TOLD

The Daily Mail reported priceless treasures in gold and silver were dug up from the grave of an Anglo-Saxon king near Ipswich, Suffolk.

France gained 742 trained aviators for her air corps with the arrival of a group of former Czech-Slovak army fliers at Calais and Boulogne.

Scrooby Routhedge, 79-year-old Australian explorer-astronomer, died of a heart attack while visiting a London manufacturing firm.

Trans-Canada Air Lines carried 5,794 passengers in the first six months of the current year, it was announced in Montreal.

Pan-American Airways will file in Washington an application for authority to begin a fortnightly mail and passenger service between the United States west coast and New Zealand.

Indication that efforts will be made to retain Lord Tweedsmuir for a second term as governor-general of Canada was given by Prime Minister Mackenzie King.

Job building contract awards throughout Canada, as compiled by Maclean Building Report Limited, totalled \$22,129,700, a gain of 4.5 per cent over the total for July, 1938.

Hon. Norman Hippe announced 600 young Ontario men will be trained as aircraft mechanics by the Ontario department of labor at the request of the department of national defense.

A group of "teen-aged" youngsters in the Calgary Rite club were announced as winners of the junior small bore rifle championship of Canada. Members of the team are believed to be one of the youngest ever to win the title.

U.S. Treasury Secretary Morgenthau announced he would make a special trip to Finland to thank that country for paying its war debt to the United States regularly. Morgenthau said the Finnish minister had invited him to go.

Prairie Broadcasting

New Station At Watrous, Sask., To Have Wide Coverage

A coverage greater than any station of its size, or even bigger, is claimed for the new Canadian Broadcasting Corporation's 50,000-watt transmitter, CRK, at Watrous.

Because the station operates on a cleared channel, 510 k.c., in a choice position on the dial, because it is based near mineralized salt land, it is without ground disturbances, and has ideal atmospheric conditions, engineers say it can be heard over most of the continent. It is anticipated that full-time coverage with reasonable fidelity will extend west and east to the Rocky Mountains to Fort William, on the North-West Territories, and south west into the United States. With favorable atmospheric conditions there is no reason CRK could not be heard in the Arctic Circle. At any rate, it will be available to every radio listener in the prairies.

The site for the station was chosen by experts from the Department of Transport. The mineral salts and deposits around Manitou lake make it an ideal spot for a radio transmitter. Some experts believe the salt and the salt deposits will make this station one of the best in the world.

It is the fourth of the 50,000-watt transmitting stations which will bring the total of 16 stations capable of the best programs from the United States and other parts of the world, as well as Canada, to radio listeners of the Dominion.

Besides the Watrous and Sackville plants, there are sister stations at Vercelles, and Hornby, Ontario, erected last year and equipped with the most modern apparatus obtainable. All these stations were carefully chosen to provide a maximum coverage of the geographical area they were designed to service.

Find New Comet

Discovery of a new comet near the constellation of Taurus was announced by Harvard Observatory. The new body, found by a Parisian named Rigollet, who is believed to be an amateur observer, was described in a message relayed to Harvard from the International Astronomical Bureau at Copenhagen. It was said to be of approximately the eighth magnitude.

Forty-eight per cent of the business and professional women in the United States have relatives whom they support, in whole or in part, by their earnings.

In his youthful days Napoleon lived chiefly on dry bread and wore shoes with pasteboard soles.

Nearly 400 types of cheese now are produced in the United States.

Plane Factory For Victoria
To Build New Flying Craft Covered With Plastic Material

Within a few months an airplane factory in Victoria, B.C., will be turning out flying craft covered with a new plastic material which will not rip nor tear even though riddled by bullets, according to Morris E. Heiser of London and Los Angeles, Calif.

The engineer who originated in 1935 the Heiser Seadream intended for use by Atlantic and Pacific shipping as floating landing fields and docks, is making arrangements for location of a factory and test runways.

As soon as a factory has been built, he said, work will start on planes built of the plastic material invented by Anders Nicolay Andersen, a Norwegian, who received a patent in 1930 from the United States patent office. Heiser and Michael Andersen, a son of the inventor, now control the patent.

Heiser came from Glendale, Calif., where several "plane" manufacturing plants are located and from where he expects technical experts to join his factory staff to help in mass production of plastic-covered planes.

"British support is behind our plan for training of Canadian youth to make and fly Canadian airplanes," Heiser said.

The basic materials for plastic airplane covering are available in large quantities in British Columbia, he said. Synthetic resin and certain oils cannot be produced without difficulty in the province.

"We propose to train youths in various branches for the factory. They will know how planes are made and how to handle plastic. Those who learn to fly, when grounded through a minor accident, will be able to repair any damage to the wings in 40 to 50 minutes.

HOME SERVICE

LETTER-WRITING A STRUGGLE FOR YOU?

Here Are Tips To Make It Easy

Sally's in despair! She has written that letter four times—and it's just too dull to send.

Cheer up, Sally! Lively letters are simple to write when you have a few letter-writing tips.

Do you give a dry catalogue of incidents? "Went for dryader-day—had to go out to dinner. Tom has a cold?"

Better to select an item or two, give more of your thoughts and feelings now. "Will be rev'd in October—chase a new dress." Write as you speak! "I tried to buy—". Be natural.

And how you can spice up a letter by knowing a few punctuation tricks. "We leave Saturday for Wyoming" sounds matter-of-fact, but "We leave Saturday—". "We leave Saturday—for Wyoming!"

Find many helpful pointers on writing greeting letters in our "Good Letter-Writing Made Easy" to the Home Service Dept., Winnipeg Newsprint Union, 175 McDermot Ave. E., Winnipeg.

In addition to the feature release, the following booklets are also available at 15¢ each:

125—"Learn to Write For Publication".

147—"How to Budget and Buy For Better Living".

149—"Tap Dancing Simplified".

Anxious Mother: "What does the average college man do with his week-end?"

Dean of Men: "Well, Madam, sometimes I think he merely hangs his hat on it."

The polar exploration ship Fram is preserved in Norway as a monument to the Norwegians who commanded it.

Eggs are boiled by electricity with cut shells with a new household device.

Onion leaves have troughs to pour water straight down to the bulb.

A sugar beet is about 75 per cent water.

Systematic Entomology
New Insect Surveys Are Proving Of Value To Farmers

An important part of the Division of Entomology, Science Service, Department of Agriculture, is the section which has to do with the classification of insects, the study of their structure, their habits, their life cycle, and the building up of a collection of specimens. This work is known as Systematic Entomology and is directed by Dr. J. H. McDunnough, who originated in 1921 the Heiser Seadream intended for use by Atlantic and Pacific shipping as floating landing fields and docks, is making arrangements for location of a factory and test runways.

As soon as a factory has been

built, he said, work will start on

planes built of the plastic material

invented by Anders Nicolay

Andersen, a Norwegian, who received a

patent in 1930 from the United

States patent office. Heiser and

Michael Andersen, a son of the

inventor, now control the patent.

Heiser came from Glendale, Calif.,

where several "plane" manufacturing

plants are located and from where

he expects technical experts to join

his factory staff to help in mass

production of plastic-covered planes.

"British support is behind our plan

for training of Canadian youth to

make and fly Canadian airplanes,"

Heiser said.

The basic materials for plastic

airplane covering are available in

large quantities in British Columbia,

he said. Synthetic resin and certain

oils cannot be produced without

difficulty in the province.

"We propose to train youths in

various branches for the factory.

They will know how planes are made

and how to handle plastic. Those who

learn to fly, when grounded through

a minor accident, will be able to

repair any damage to the wings in

40 to 50 minutes.

Increase In Game Birds

Prairie Chicken Said To Be More Plentiful

Game birds of western Canada, projected in recent years by conservation methods designed by sportsmen themselves, are on the increase, promising a good season for hunting.

Prairie chicken, ruffed grouse, partridge, pheasant and the imported Hungarian partridge all have larger families this year.

Prairie chicken, which in earlier years could be found on the prairies by the thousands, were threatened with extinction a few years ago. The shooting season was curtailed in most provinces.

In spring the chickens congregate in "dance grounds"—usually a bare knoll—for an elaborate mating ritual, as the males strut around with feathers primped uttering a low cry as they prepare to select a mate. The same "dancing grounds" are used again after mating.

Hunting has been limited in Manitoba in recent years and in 1938 only four days were allowed, in mid-October. The bag limit was 20 birds a season. A week's shooting will be allowed this year.

In Saskatchewan a longer season is permitted, from Sept. 18 to Oct. 21 this year with a big limit of 10 chicken daily and 50 for the season.

Prairie chicken are increasing rapidly in Alberta. In the northern districts an open season may be permitted for one month this year. Central and more settled districts will probably have two weeks but in southern sections of the province conservation methods will be maintained and no shooting will be allowed this year.

It is the fourth of the 50,000-watt transmitting stations which will bring the total of 16 stations capable of the best programs from the world, as well as Canada, to radio listeners of the Dominion.

Besides the Watrous and Sackville plants, there are sister stations at Vercelles, and Hornby, Ontario, erected last year and equipped with the most modern apparatus obtainable. All these stations were carefully chosen to provide a maximum coverage of the geographical area they were designed to service.

Rothschild Museums需 rare flea to complete collection

It requires only one little flea to complete the collection of jumping insects at the Rothschild Zoological Museum at Tring, but Dr. Carl Jordan, the 70-year-old curator of the museum, despaired of ever finding it.

For this is not ordinary common garden or rooming house flea. It lives among the spikes of a porcupine and a pretty rare species of porcupine at that.

More than three years ago Dr. Jordan commissioned W. G. Hodgson of Drumheller, Alberta, to capture one for him, and Hodgson is still looking.

Chasing fleas on a live porcupine is not the easiest job in the world, and when the animal is dead the flea leaves its body.

A piece of 2,000-year-old lead water pipe from Rome is in New York's Museum of Science and Industry.

In one day \$100,000 was raised in England for the Submarine Disaster Fund.

Approximately 50,000,000 gallons of tomato juice are canned commercially each year.

SUNDAY SCHOOL LESSON

AUGUST 13

ELISHA: A LIFE OF HELP-FULNESS

Golden text: Be ye kind one to another. Ephesians 4:32
Lesson: II. Kings 5:1-27.
Devotional reading: Ephesians 3:14-20.

Explanations And Comments

The Prophet Elisha and Naaman, 2 Kings 5:8-14. Elisha heard of Naaman's arrival and the king's distress, and of his wife's sickness. The Syrian knew that there was a king in Israel; he should also learn that there was a prophet. Elisha sent a servant to bid him go and wash in the Jordan seven times, and he should be cured.

Naaman felt that he had been ill-treated and was angry with his captors. He had a servant who had a spear and a bow, and he said, "I will not go to wash in Jordan." Elisha said, "Go and wash." Naaman did as he was told.

As Naaman was turning away in a rage, the servant followed him. Elisha approached and addressing him as "My father," the customary title of honor, said, "The prophet has bid you go, wash your head seven times in the Jordan." Naaman said, "How much rather then when he saith to thee, Wash and be clean?"

Naaman reconsidered the advice. Elisha said, "Go and wash." Naaman acknowledged that he had brought his pride and obeyed. His flesh came again like unto the flesh of a newborn babe. The priest then washed him clean, that he might not have the plague; he was then clothed in white.

God's Gifts Are Free, 2 Kings 5:15-19. The general returned to Elisha and wished to prove his gratitude by giving him a present. Elisha said, "I have no need of your gifts." Elisha's servant, Gehazi, tried to gain possession of some of the silver and gold which the general had given him. Gehazi said, "The man is a prophet, and he will sacrifice only to him."

Gehazi said, "The man is a prophet, and he will sacrifice only to him." Gehazi said, "The man is a prophet, and he will sacrifice only to him."

Elisha said, "I have no need of your gifts." Gehazi said, "The man is a prophet, and he will sacrifice only to him."

Elisha said, "I have no need of your gifts." Gehazi said, "The man is a prophet, and he will sacrifice only to him."

Elisha said, "I have no need of your gifts." Gehazi said, "The man is a prophet, and he will sacrifice only to him."

Health League of Canada presents TOPICS of VITAL INTEREST by DR. J. W. S. McCULLOUGH

GENERAL CARE OF THE EYES

Valuable suggestions on the care of the eyes are contributed to the summer number of "Health" by Dr. Clarence E. Hill, of Toronto, as follows:

In the daily routine of life, it is important to always remember to wash the eyes after touching bannisters, door knobs, push plates, etc., to avoid carrying infection to the eyes. Even shaking hands transmits germs from one person to the other. Rubbing the eyes after using a handkerchief to blow one's nose is a possible and probable source of infection.

Danger of infection lurks in swimming pools if the eyes are opened under water and bath towels at public pools, beaches and shower rooms are sources of contamination.

When motoring, try to prevent dust and sand from blowing or splashing in the eyes. Trying on other people's glasses and goggles can transmit lid infections and even cause eye ulcers.

The allergic inflammations from foods eaten and from external irritants, such as pollen from trees and flowers, and dust and dander from pets can be guarded against if they seem to cause an irritation. Tissue towels and pads are useful to the sensitive person to have inflammation of the eyelids or eyeballs.

Reading during an illness or while trying to read in the sun and in the moon may produce short-sightedness. Also, reading with poor illumination and in a cramped position for a prolonged period may cause optical errors or inflammation of the eyes.

In some diseases, such as bad goiter, and particularly in uncorrected cases, the eyes may be closed to avoid injury or drying of the eyeball, thus spoiling the vision.

Avoid the common method of removing eye makeup by using the household method of putting eyestones or flaxseed in the eyes. These are used to clean the eyes.

Avoid watching the flame of welding or an eclipse of the sun, without protection of the eyes, as these cause inflammation of the eyelids or blindness. Avoid foreign bodies or sand blasting when stoking or locomotives or when working on boats.

Use non-shatterable glasses in car and keep the driver's window closed to avoid injury or damage to the eyes.

From hot or hot water must be guarded against in cooking. When stoking fires or lighting gas heating, when smoking, never blow smoke in the eyes. Use non-shatterable glasses if playing or working in dangerous places.

Never eat raw fish or raw eggs and fat. If you are ill, consult your doctor. You may need to eat a diet which can cause serious eye damage, such as Diabetes, Blood Pressure, Anemia, etc. Keep free from colds, and watch your teeth to avoid the types of chronic irritation or infection.

Editorial Note: Readers desiring the complete set of "Health" by Dr. McCullough, should write to The Health League of Canada, 105 Bond St., Toronto, Ont.

Visit Canada

President of Associated Country Women Of The World Returns To Canada

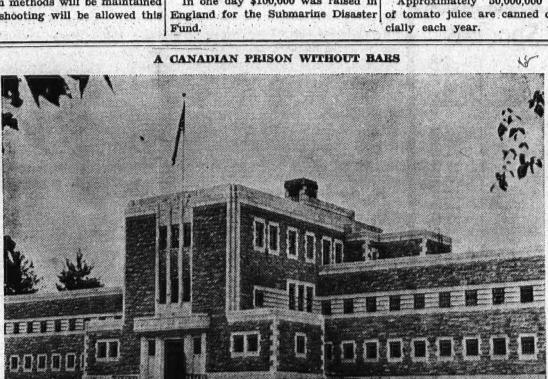

Mrs. Alfreda Watt, president of the Associated Country Women of the World and one of the founders of the 10-year-old international organization, has arrived in Canada from England for a three-month visit to the native land she left 40 years ago.

Though she has business to do in Ottawa and Toronto and will attend the annual convention of the Canadian Women's Institutes in Edmonton, white-haired Mrs. Watt told reporters the purpose of her trip is to "get the tonic effect of Canada's electric atmosphere as much as anything."

There are more than 2,500 species of snakes in the world, and about 400 of them are poisonous.

Tokyo, Japan, has just estimated that 1,250,000 of its citizens go on a spree at least once a month.

Soviet whalers plan to catch at least 500 whales this year.

The new county jail at Hull, Que., first and only one in Canada to have bar-less windows, which will be ready for occupancy shortly. Windows have double glass panes which are set eight inches into the walls. The building is said to be the only one of its kind in the British Empire.

HE WASN'T A SUCKER!

Castosity may lead a man into deep waters. Not so with Andy Cleaver. The other day he received a thought-provoking card from Cleveland, Ohio, which read: "Dear Friend: An interesting news item concerning you has appeared in a Cleveland, Ohio, newspaper. We will mail you this complete article upon receipt of 25c. The article is favorable." That excites interest, but Andy claims he can use that two bits right here—and besides he knows everything that he's done.

A TAX ON TRAILERS

A wind with cyclone force struck the stockyards Wednesday afternoon, when a government agent, armed with the powers of the government, made his appearance and demanded the "poor" farmers to pay a license for the trailers they were hauling their hogs to market in. It was a matter of coughing up \$2.50 for a two-wheeler and a five spot for a four-wheeler. It was a somewhat crude manner in which this tax collection was carried out, and many a pious party had to dig his fingers deep in his ears to escape the torrent of farm eloquence that was forthcoming from the poor victims. Ponoka Herald.

EVEN MOTOR ACCIDENTS
MEAN DEATH CLAIMS

In the Life Underwriters' News for June an interesting parody of an old ditty appears. The Underwriters' News had the lines well illustrated, though the words themselves are quite expressive. Here they are:

10 Little motorists driving in a line;
One tried to pass the rest—then there were nine.
9 Little motorists, sadly I relate;
One passed a traffic stop—then there were eight.
8 Little motorists, young and very deaf;
One tried to show such skill—seven were left.
7 Little motorists, touring in the six;
One failed to dim his lights—then there were six.
6 Little motorists, very much alive;
One did not see a train—then there were five.
5 Little motorists, driving in the rain;
One skidded on a curve—four now remain.
4 Little motorists, coming from a tea;
One faced about to chat—then there were three.
3 Little motorists, this is sad, but true;
One slumbered from fatigue—then there were two.
2 Little motorists, racing just for fun;
One passed upon a crest—then there was one.
1 Little motorist, though it's seldom done;
Let a match to gauge his tank—then there are none.

She: "I want a man who doesn't drink, smoke, swear, or philander." He: "What for?"

Teacher: "How many of you children want to go to heaven?"

All the children raised their hands except red-headed Johnny.

Teacher: "But, Johnny, don't you want to go to heaven?"

Johnny: "My mother told me to come straight home from school."

THE WAY OF ALL SECOND
HAND CARS

Jimmie, the painter at the Cos, A business man he thought he was. He, had a car, a Chevrolet, And drove it out both night and day. He drove that car for quite while, Until he thought 'twas out of style; So looked it over, outside and in, And said: "I'll sell this piece of tin!"

I fixed the mudguards, gave a sigh, At seeing the speedometer ragin' high! Then in he got and foaled aroun' Until he got that darned thing down.

Then got himself a "For Sale" sign And hung it with a piece of twine. He painted her with a satisfied look, And said he'd sell her by crook.

Then long came Louie, a porter boy, With money saved for a rainy day. Oh, boy!" said Jim, "I'll make a deal— wait till he is at the wheel!"

Showed the car from stem to stern. "I'll teach you if you want to learn!" But now," said Louie, "I'd lose my life If caught in that by my would-be wife."

Home he went to see the girl—

He gave consent, then in a twirl!

He came right back—right on the fly.

And said: "I'll buy if not too high."

The price was set, did not take long;

Lou bought the car he thought for song.

Well, in he got to start the car—

And trouble met are going far.

He stepped on starter, gave a sigh,

Shifted the gear from low to high;

But the darned thing jumped and wouldn't go.

Though he changed the speed from high to low,

He tried again, and gave more gas,

But the car stood still like a stubborn ass;

Then his spirit rose, but the battery was low,

When he let out the clutch, she seemed ed to go.

So, off he sped to his own back yard,

And greased her up with frying lard.

The spark plugs fluttered, the fan belt slipped,

And Louie yelled: "By gosh, I'm griped!"

The starter broke, but he had a crank;

And he had a hole in the gasline tank.

The exhaust smoke came terribly dense,

And when he backed he went through a fence.

Next the hind tires, they both went flat—

Poor Louie cried "Now, look at that!

I can't get a pump unless I pay.

So I'll stuff 'em both with this nearby hay."

That car looked sad, a wreck no doubt;

And there and then the license's out;

Now, without plates it ain't much fun

To own a car you can't just run.

Now, boys, if you want an honest boy,

Don't jump at a trap you chance to spy;

But buy from a chap who's dealing fair,

And you'll have a car to go anywhere.

—Eastern Chronicle, Burpyn.

Mother: "Well, William, did you do anything besides eat at the Sunday school picnic?"

William: "Yes, mummie; we sang a hymn called 'We Can Sing, Full Though We Be!'"

Mother: "Why, William?"

Big Sister: "The title of the hymn, mother, was 'Weak and Sinful Though We Be!'"

Living FORESTS
FILL DAY-ENVELOPES!
A DEAD FOREST REPORTS HOLLOW!
NEXT TIME YOU SEE A TREE,
THINK OF THE FOREST AS
A DEADLY BANGER!"

NEWS FROM EDMONTON

(T. B. Windros)

Edmonton, Aug. 7.—Although the prospective yield this year has been reduced to some extent by lack of rain in the past few weeks, Alberta's 1939 wheat crop still will have a much greater volume than last year, a survey indicated at the week end.

The first of the harvest already has been taken in the south of the province, and is grading well, it is reported. In the north, including the Peace River district, cutting will start within the next few days and indications are that grain is filling well, with an excellent yield in prospect, said an official bulletin.

With a price-peg of 70 cents on the basis of No. 1 wheat at the lakehead or Vancouver, and a peg of 69 cents on all over, 5,000 bushels from one farm, on the federal government's guarantee, the Dominion will be subsidizing Alberta wheat farmers by dozens of millions of dollars this year through the difference between the per acre price and the actual market value of the grain, in addition to the guaranteed prices on coarse grains and other farm products, and the acreage bonus on crop failures, it was pointed out.

Provincial Treasurer Solon Low and Manager F. A. Hennig, of the Alberta hail insurance board, said that hail insurance risks this year totalled about \$10,000,000 on 2,341,000 acres of Alberta farm land, represented by 14,457 different applicants.

Norman Sommerville, K.C., nationally known as a Toronto lawyer, particularly as commission counsel for the price spread and mass buying probe in 1935, and lesser known as new president of the Edmonton stockyard, advised Alberta farmers last week to turn to stock breeding on a big scale now, and feed the coarse grains.

In the meantime, the province's other great natural industry, oil production, continued to be worried and hindered by governmental interference through the investigating commission appointed by Premier Aberhart's order last year and sitting in Calgary ever since. Leon L. Plotkins, manager of a jobber company, told the commission on Friday that the action of Imperial Oil, Limited, in reducing its price on tractor gasoline and distillate a week earlier would result in a gasoline war. The new prices, said Plotkins, were "too low."

Any idea of a price war which would be destructive to the industry was denied later outside the probe, however. Big companies said that their prices had been reduced at the same time, each on its own structure, in accordance with gradually decreased production costs.

"The recent changes are just a normal development under prevailing conditions with prices moving under free and open competition," said a leading official of one big company. "The fact that prices are free at the present time to move in this way is the only sound guarantee which consumers and producers alike can have of equitable treatment for both."

"Any government interference adversely affects one or the other (consumer or producer) and, in the long run, both."

Earlier in the probe the commission chairman, Judge McGillivray, had agreed when H. Brundsen, an oil company official, said that the average man on the street could not understand the reason for a difference of \$5 to \$6 a barrel between crude oil and refined products. Mr. Brundsen had added that there was one simple reason, which was government taxation of the oil industry. Out of the 19.7 cents per gallon wholesale price, his company gets just 1.27 net to cover contingencies, replacements, sinking fund and dividends, he said, while the government tax is 4.94 cents, or about four times as much. Judge McGillivray remarked that the government therefore had a greater interest in oil refining and marketing than the companies had.

Premier Aberhart and other Social Credit cabinet ministers and members continued the election campaign tour

of the south during the past week. They indicated that roads would be the government's chief talking point in the bid for votes. The premier made promises of "consideration" for roads everywhere he went. Among those to be "considered," he said, would be a north-south road one hundred miles east of the present Edmonton-Calgary route.

All the Aberhart promising and talking did not go over so good, however. At Foremost, for instance, his mention of roads was greeted with boos. At another meeting his statement that the government had reduced taxation, was given a flat denial by a member of the audience.

Substantial crowds have greeted the premier in a few places and opposition leaders are urging people to attend his meetings so as to hear for themselves and analyze closely the exaggerated statements he makes. The element of entertainment also draws a crowd. The circus always is well attended, one observer remarked. Its influence is about nil also.

A SMILE:

It's understood by everyone

From Alaska to the Nile.

It has the potency of sun—

This friendly, beaming smile.

It's worth no end of money,

It cannot hurt or rile.

It's sweeter far than honey,

This friendly, beaming smile.

It has the pow'r to do so much

Along the weary mile.

It is the tender, human touch—

This friendly, sunny smile.

To give it is no trouble,

It always is worth while;

It pricks a grief-blown bubble—

A swift and generous smile.

It says: "Buck up, be of good cheer,

The world's not wholly wise."

It gives new courage, slays a fear—

This friendly, joyous smile.

It's easier far than any frown—

It always is in style,

And lives in country or in town—

This friendly, beaming smile.

Some folks have an idea that every time a newspaper refers to Able's failures, that particular newspaper must suffer thereby. The fact of the matter is that the newspapers of Alberta formed the only institution in the province that did not fail for Able's silly promises, but voted 98 children's toys in Japan.

LOCAL AND GENERAL ITEMS

A new by-word: "Give us another four years and we'll be satisfied."

The town of Stavely has been included in the Claresholm municipal hospital district.

The government's portion of the Alberta grain crop should have been grabbed when it looked good.

The "faithful" who still look forward to Aberhart's promised dividends are to be pitied, indeed.

Our first rain in about five weeks fell on Sunday morning last. Later the top of Turtle Mountain was covered with snow.

A Blairmore kitchen was entered one night last week, and several newly-made apple pies disappeared. Gee, they were delicious!

Western Grocers' warehouse at Lethbridge was entered on Saturday night last, when about \$1,000 worth of goods were stolen.

Mrs. E. Russell and Miss Davis, of Calgary, stopped in Blairmore for a short while on Sunday last enroute to holiday at the coast.

Elderly Lady from the country: "Isn't it wonderful how these filling station people know exactly where to set up a pump and get gas?"

The government's achievement: "We have got rid of 1,313,098 golfers." Well, what are the Alberta voters going to live on now?

Mr. and Mrs. Allan Hamilton and son Tommy, after spending upwards of a week with relatives and friends here, returned to Drumheller on Monday.

The folding device attached to a newspaper press, known to some as a trailer, has not yet been licensed. Boy, what a lovely opportunity to squeeze another dollar!

At the annual convention of the Canadian Weekly Newspapers' Association at Niagara Falls last week end, H. R. Halliwell, editor of The Caledonian Journal, was elected president.

A motor tourist from Cape Town, South Africa, passed through Blairmore the early part of last week. He and his party are making a complete tour of the Dominion and the U.S.A.

A province-wide celebration on August 22nd to commemorate the fourth anniversary of the Social Credit victory at the provincial polls, was announced by Premier Aberhart on Sunday last.

Chief Rorstrum, of Stavely, figured in Calgary police court last week end, when he was charged with driving his motor cycle to the common danger. He admitted speeding to 50 m.p.h. near the city.

Mr. Karp, who succeeds W. A. Vaughn as Western Grocers' representative in this territory, will move his family up from Lethbridge and occupy the former Vaughn residence on State Street east.

Thirty years ago last month the Coleman Miner changed hands, passing from the ownership of H. E. Lyon, of Blairmore, and others of his company, to a new company headed by J. D. S. Barrett and T. B. Bradon.

One observant farmer, speaking of the Alberta government opening up agency for sale of farm machinery parts, made the prediction that it would end in failure and at great cost to taxpayers. However, he considered it was only a pre-election dodge, and would end after next election. Aberhart cannot again offer \$25 a month dividend, so he thinks he can capture the farm vote by giving them inferior repair parts at a lower price than the superior article from the implement companies. Aberhart always claims he is opposed to socialism, but this step looks like a step in the way of socialism. —Ex.

WORLD'S HIGHEST RAILWAY HAS DIESEL LOCOMOTIVE

An outstanding achievement of British engineering enterprise is the building of a Diesel locomotive to run on the highest railway line in the world, near La Paz, the capital of Bolivia.

The engine has now passed all tests, including the six-mile climb with a gradient of 1 in 14 along a series of sharp "S" curves from La Paz to the plateau 2,000 feet above the city and 16,000 feet above sea level.

Built for the Peruvian Corporation, it will operate on a circuit where conditions are so severe that engineers have hitherto believed them to be beyond the powers of such an engine, which they thought would prove so cumbersome and costly (compared with the present electric traction) as to be economically unworkable.

The Peruvian Corporation consequently placed a number of safeguards in their contract, and a firm in Leeds, Yorkshire, accepted the "challenge." The engine they built has now proved able to handle its load with ease at the highest altitudes of the tortuous mountain track, and to be exceedingly economical on fuel.

Special features of the locomotive are: supercharged engine, 330 horsepower, with exceptionally large radiator to maintain an efficient temperature at high altitudes where air density and conductivity are greatly reduced; independently-fitted additional starting system, petrol-driven, to avoid any possible delay; and a quadruple system of brakes, working independently.

THE PURPOSE OF A PLATFORM

Two American negroes were discussing politics, and one politician in particular, "Well," said Sam, "Ah like him all right, Ah guess; but his piat-fom ain't no good."

"Platfom," replied Big Bill. "Platfom; say, don't you know dat a political platfom is jest like a platfom on one o' dese railway cars—hit ain't meant to stan' on; hit's jest meant to git on!"

Pete: "I wonder why men are always so jolly and good natured?" Mike: "That's easy. They can't run and they can't fight."

Teacher: "How old is your father?" Tommy: "Thirty-eight, sir."

Teacher: "Well, I must get you homeworke more suited to his age."

LOCAL AND GENERAL ITEMS

Co-operating with the provincial government, Pincher Creek is hard surfacing its main street.

Dr. E. J. Anderson, of Calgary, was in town the early part of the week, accompanied by Mr. H. Kilpatrick.

S. J. Lamey was a business visitor to Calgary this week, and attended a conference of insurance representatives.

In all advertising done in Canada in the past year, the weekly newspapers took second place as advertising media.

A cargo of timber from British Columbia was recently delivered in Newfoundland from the steamer Harrington Court.

Politics is the art of obtaining money from capital and votes from labor on the pretext of protecting each from the other.

Rev. Ralph C. Crouse, former pastor of the Prophetic Bible Institute Baptist church, has left Calgary for his former home in the United States.

Tommy Allan and family motored to Calgary on Sunday, the former returning on Monday. Mrs. Allan and her two sons stayed over in the city for a few days, and will return home today.

Constable and Mrs. J. Klassen, of Regina, Saskatchewan, visited friends here on Tuesday and Wednesday. Const. Klassen was formerly connected with the R.C.M.P. detachment here.

John Roberts, formerly connected with the local telephone exchange, now in Calgary, has been a holiday visitor in this district, guest of Mr. and Mrs. W. Oliver at the Crystal Dairy. During his stay he spent a few days camping and fishing.

If the Alberta government wanted to save the farmers—and almost everybody else—some real money, it would not be frattering away its time playing around with 25,000 nuts and bolts for farm machinery, but do what the British Columbia government has done, reduce the price of gasoline to the consumer. Alberta has more gasoline than we know what to do with. British Columbia has to import every gallon sold in that province, yet Albertans are paying 3¢ while the consumer in Vancouver after August 7th will be able to buy a gallon of highest quality gas for 2¢—Trochu Tribune.

AGE OF MOOSE

TOLD BY ANTLERS

It is not possible to determine the age of an adult or sub-adult male moose by the number of points on its antlers (one for each year of life) because, in this respect, age and antler growth bear no relation. For instance, a five-year-old moose may carry seven or more points on each blade; it may carry only four. Furthermore, the number of points of each antler are not always equal, which would confuse the computation even if it had value. And to add the total of a pair would often suggest an age beyond the period of normal existence. With reference to young male moose the case is more or less reversed, for a rising two-year-old usually carries a pair of spikes, and a rising three-year-old two crotches with some palmation. The rule, however, is not general or strictly applicable, as sometimes the crotches appear as the first growth and a large area of palmation, with points, as the second growth. There is no known method of determining the age of moose, male or female, which is satisfactory. Size and appearance give the only clue.

The Roman Catholic church has purchased the First United church property at Lethbridge. First United congregation propose erecting a new edifice.

As we were going to press last week we were informed that Mr. and Mrs. Jacki Oakes had returned from their honeymoon. Such was not correct, however, but they are due to arrive today or tomorrow.

M. H. Herman, for several years travelling representative of the Union Packing Company on this territory, has been transferred to the company's branch in Victoria, B.C., and is succeeded here by Mr. L. Higlett, of Lethbridge.

On Wednesday of this week the town of Hanna, Alberta, celebrated its 27th birthday right royally. There were field sports and a thousand pounds of barbecued beef with matching accessories, free to all. The day's programme was climaxed by a dance, which required two halls to accom-

modate the crowd, and to supply music loud enough to be heard in both music books the size of Abie's record were used.

Mechanics Professor: "Name a great time saver?"

Sophomore: "Love at first sight."

MAIL COUPON NOW (OR HAND IT IN) TO THE BLAIRMORE ENTERPRISE

Life Begins At Forty

"Do you know that if you are a resident of Canada or the United States you got your last year of life absolutely free? That is to say, at the end of 1938 you had just as many years left to live as you had at the end of 1937."

The foregoing rather startling statement appears in a recent issue of Toronto Saturday Night, an editorial prelude to an article by Dr. E. Clark Noble, M.A., M.B., M.R.C.P., Medical Referee of the National Life Insurance Company with headquarters in Toronto.

The article in question deals with the extraordinary advances made by medical science in the past few years, showing such a remarkable acceleration in the field of medical science was able, during the twelve months of 1938, to give as a donation to humanity on this continent another full year of life expectation.

The announcement, if founded upon unquestioned statistical data and if the statistics have not been misconstrued, as statistics sometimes are, opens up a great vista of speculation. For instance, one is inclined to ask whether this means, provided discoveries in the realm of medical science continue to advance in geometric progression, as they undoubtedly have done in the past two or three decades, that the time is rapidly approaching when human life can be extended indefinitely. Certainly, if the progress of 1938, as construed by the editorial not, is maintained and exceeded, is it to be assumed that at the end of every year hereafter, the life span is to be extended another full year? If so, it can only be translated as extension to infinity.

On the other hand, does it mean that the saturation point in medical progress has been reached, and that hereafter there will be a slowing down in the life-saving process through new discoveries in the field of medical science and their application to disease and death? Apparently not, if Dr. Clark Noble, in his prophetic moments is correct, for he concludes his treatise on the progress of the past few years with the comforting statement that: "We may face the future with confidence that our span of life will be still further increased as years go by."

More Disease Prospects

In his analytical article covering the increase in longevity on this continent in the past 30 years, Dr. Clark Noble states that "This increase amounts to approximately nine years in the case of male lives and 12 years in female, the expectancy of life at birth having risen from 53 years to 61 1/2 in the former instance, and from 53 years to 65 in the latter. The increase has been fairly gradual until the past 12 months when it has shown the remarkable increase of one full year."

Prior to 1938 some authorities on the subject have been wont to point out that increases in longevity have been largely due to the savings which have been effected in infant mortality as a result of improved sanitation conditions and the preventive work of public health officials and have pointed to alarming increases in recent years in the death rates attributable to diseases of the elderly and more particularly cancer and heart disease, their contention being that these diseases are more prevalent than they used to be and give such reasons as age at high tension in the present age as causes.

While it is undoubtedly true to some extent, it is becoming more people to-day to live to an older age than heretofore. In other words, a greater percentage of the population to-day has reached the age where they become susceptible to such diseases. This, at any rate, is the conclusion reached by Dr. Clark Noble, explaining his theory in the following words:

"During the 30 years prior to 1938, the decrease in the death rate among white adults amounts to, roughly, 40 per cent, falling between the extremes of 80 per cent. at the low ages (1 to 4) to 25 per cent. at the high ages (65 to 74). It will be noted that the decrease involves all ages, but is greater in the lower age bracket with the result that the general population is ageing, and, therefore, we observe an apparent increase in the death rate from the diseases which take their toll in later life, particularly cancer, and degenerative diseases of the heart, arteries and kidneys."

Hope For The Elderly

If these percentages are acceptable, and there appears to be no reason why they should not be regarded as correct, they demonstrate very clearly that while the saving of life in the early years has been tremendous, on the other hand the more moderate saving in the later years of the human life span warrants Dr. Noble's use of the term "increasing" when applied to the increase in the death rate due to diseases of the elderly."

But even here, it should be pointed out, there has been a conservation of longevity among the elderly as a result of medical research and discoveries, the recent discovery of the value of sulphamamide in the treatment of pneumonia being one of the latest.

So much has been done to increase the life expectancy of the infant and the young child, that it is reasonable to suppose that any further conservation of life which may ensue in the near future will increase the life expectancy of those who have reached middle age and beyond, and it is probable that "Life begins at Forty" will become literally a truism.

Priceless Treasures

Grave Of An Anglo-Saxon King Yields Riches

The Daily Mail reported priceless treasures in gold and silver were dug up from the grave of an Anglo-Saxon king near Ipswich, Suffolk.

Reaching the heart of the treasury after nearly a year's digging, the paper said, the archaeologists used their hands to prevent damage as they removed the last earth from a jewelled scarab, a gold bracelet, a carved in bas-relief a mosaic, a gold helmet encrusted with precious stones, a solid silver bowl 30 inches in diameter, and three rings and six bracelets covered with rubies and emeralds.

The objects will be sent to the British Museum, where they will be cleaned by experts.

Have Their Own Language

Circus folk have a language all their own. To them, camels are humps, elephants are bulls, monkeys are old folks, hippos are hogs, hyenas are gravediggers, and ostrich are big turkeys. People who take in all the free sights but never buy tickets are lot-fleas to them.

A new mineral, officially named "Charles Dickens," has been found in Wyoming.

A Synthetic Age

The Marvelous Strides That Science Has Made

If Henry W. Longfellow, well over half a century ago, could serve notice on his world that "Things are not what they seem", do it, too, without surprising the customers at large—has his poetic announcement accepted for the fact it was, then the curious to-day may wonder what would be his verbal reaction if confronted by the present masquerade of men, manners, and matters that flesh the world as it keeps on turning.

Shakespeare dealt with the question of appearances a bit differently. His pronouncement was that "All that glitters is not gold." And in this irreverent age the answer may well be "Who cares?" To-day it is a popular theory that all is well that looks well. Even when not put into words it seems to have a generous quota of followers. And that does not make them blameworthy. As long as he does not trespass on his neighbor's property, the individual is right to form an opinion and stick to it, that is provided he lives in a free country where ideas are not regimented, and the governed still have a voice in government.

This, without fear of libel, may well be called a synthetic age. Time was when a salesman's persuasive "Just as good" meant caveat emptor to the person on the purchasing end of a transaction. But not necessarily any more. The buyer expects substituted and marvels at the strides science has made—knowing that original sources of many commodities are changed because of the magic of chemistry. Manufactured pearls, silk without benefit of mulberry leaves, textured from milk, glass, wood, and many other unlikely things are already accepted without surprise.

Longfellow was right. "Things are not what they seem." Very often they are a whole lot better. In the laboratory of to-day the chemist may quote the great bard who dwelt by the Avon, and say "The world's my oyster"—one not, however, to be opened with a sword but to be conquered by the great knowledge that research has placed at the command of science.—Ottawa Journal.

SELECTED RECIPES

PEERLESS ANGEL FOOD WITH ICING

(2 to 15 egg whites)

1 cup sifted Swans Down Cake

1 1/2 cups sifted granulated sugar

1/4 cup egg whites

1/4 cup cream of tartar

1/4 teaspoon vanilla

1/4 teaspoon almond extract

Sift four ounces of flour and 1/4 cup sugar and sift together four times. Beat egg whites and with rotary egg beater or wire whisk. Fold in cream of tartar and continue beating until eggs are fully enough to hold up in a wire whisk. Add remaining 1 1/4 cups sugar, 2 tablespoons at a time, beat until rounded egg beater or flat wire whisk after each addition until sugar is just blended. Then sift about 1/4 cup flour over mixture and fold in lightly, gently through batter with knife to remove air bubbles. Bake in slow oven (325°) for 1 1/2 hours. Turn oven off. Remove from oven and invert pan 1 hour, or until cold. Rub crust gently from top and sides of cake and spread thinly with Pineapple Icing.

Note: Remove eggs from refrigerator several hours before using. They beat up lighter and more easily when cold. Add a few drops of water to give increased firmness of grain and delicacy of texture to angel food cake.

Pineapple Icing

2 cups sifted confectioners' sugar

1/2 cup drained crushed pineapple

1 tablespoon lemon juice (about)

Add sugar and salt to crushed fruit, mix well. Then add lemon juice to give consistency to spread thinly on cake. Makes icing to cover top and sides of angel food.

Soil Surveys

With the object of making an inventory of soil resources in the Prairie Provinces, the nature, location and extent of the various soil types is being determined through soil surveys. This work has been in progress for a number of years. For the most part it is carried on under a co-operative arrangement between the Dominion Experimental Farms and the Provincial Agricultural Colleges.

Valued As Novelty

Novelties of the large Canadian cent appealed to a tourist from Ohio, who gathered a lot of them in Hastings, Ont., to give to Ohio children accustomed only to the small Lincoln copper.

A Good Supply

A service club at Peterborough, Ont., asked for towels for an underprivileged boys' camp. They got plenty with the names of hotels, railways and steamship lines on nearly all.

Has Become commonplace

Crossing Ocean By Air No Longer Is Thrill For Public

Where the pioneers of only a dozen years ago created the "big news" of the day on the air roads of the North Atlantic the great four-engined Clippers of Pan American Airways fly to-day with the regularity—if by no means the sedate pace—of ferryboats. The Atlantic crossing, scoffed at dream of the men of wings who followed the Wrights, and goal of scores of intrepid pilots on the Lindbergh trail, has become almost a commonplace.

In the presence of a little knot of onlookers for the most part relatives and friends of passengers the Yankee Clipper takes off, the Atlantic Clipper lands, the Dixie Clipper wings away—beginning or completing journeys that span 4,000 miles of sea in little more than twice around the clock. With characteristically quick assimilation of new marvels of the machine age, the American public already takes Atlantic flying on schedule in its stride.

Equally in character is the prompt way in which travellers take advantage of the new speeds thus magically made available, on errands of emergency, business and pleasure. Lengthen Life Span

Chemists Report The Effect Of A Balanced Diet

Relatively simple diet improvements can postpone the onset of old age and lengthen the life span. Dr. H. C. Sherman and Dr. H. L. Campbell of Columbia University's chemistry department told the Pacific Science Congress.

They reported repeated successes in experiments on white rats. They made no reference to the possible effect on humans but said the diet is "probably as good nutritionally as many of our American diets."

Two methods were used. In one they added extra protein, minerals or vitamins, or all three, to the largely prepared food. In the other they added no outside substance but simply varied the proportion of the various staple food articles in the diet.

The changes were so arranged as to keep bodily growth and development to the animal "asymmetrical"—that is, these two phases of life progress were kept in step. This prevented the accumulation of excess fat and kept the rate of growth down sufficiently to prevent any lessening of vitality.

Animals thus treated, they said, attained maturity somewhat earlier than normal, had a longer period of adult vitality and reached senility later.

New Zealand Ready

Has Issued War Detailing Plans For Emergency

Announcement of a "New Zealand Contingency War Book," detailing plans for an emergency, has been made by Lt. Gen. Sir Alan Savage.

The book is the result of 400 committee meetings and the co-operation of 40 government departments. Most of its chapters will remain secret until an emergency.

Mr. Savage revealed the main headings: Emergency legislation; mobilization; medical examination of recruits; guards for vital points; control of aliens; coast watching; control of aircraft; trading with the enemy; broadcasting; overseas telegraphic correspondence; priority of printing; accommodation for extra staff.

The book provides instructions to members of the various emergency services for action: first, when there is a threat of war; second, during a pre-emptive period when war appears to be probable; and, thirdly, when war has broken out.

A comprehensive organization for supply is outlined, involving action by 24 departments and providing for foodstuffs control, medical and oil supplies and overseas trade.

Land Area Of West

The total land area of the three Prairie Provinces is 452,158,720 acres of which the area seriously affected by drought in recent years amounts to 103,300,000 acres or 22.6 per cent. In the drought area there is a population of 915,186 in the rural areas, 702,696 living on 171,622 farms.

Early examples of veneered furniture can be traced back to ancient Egypt, when it was made for kings, for the dead.

Chemists of a large rubber company have developed a new plastic for coating paper to make it resistant to water, oil and many acids.

Refugee Troops

Two Hundred Thousand Without Country May Strengthen Army Of France

France, haven for "men without a country," at last has opened her official eyes to the potential army of between 200,000 and 300,000 fighting men living within her borders.

More than 180,000 Spaniards of fighting age, most of whom are hard anti-Fascist veterans of Spain's civil war, are in French camps.

Thousands of anti-Nazi Germans slip across the frontier into France each year. Czechs too have made in France their European headquarters and many of them are well-trained officers and soldiers.

The first indication that the government might do something about these men who have frequently signified their desire to fight for France came last April.

Then 300 Spaniards signed up for the Foreign Legion. Tens of thousands of Spaniards applied for admission.

The next step was to make it possible for foreigners to prove that they would fight for France in the event of war. A decree was passed providing for such "peace envoys" as "representatives for war," but organizing work has progressed slowly.

Finally, the government ordered a "provisional census" of foreigners between the ages of 20 and 48 who are not nationality or were admitted to France as political refugees.

Canada moved up to fourth place in importance as a source of supply for imports into the Union of South Africa, displacing Japan, and coming after the United Kingdom, the United States, and Germany, in the order named.

Herr Goering, Nazi No. 2, has a specially designed uniform for each of his nine resounding titles and a magnificent set of dinner plates to match each suit. Many a battle is fought at the table.

Chemists of a large rubber company have developed a new plastic for coating paper to make it resistant to water, oil and many acids.

SAYS STRENGTH OF PEACE FRONT MAY AVERT WAR

London.—On the eve of parliament's adjournment for two months, the foreign secretary, Viscount Halifax, cautioned Great Britain against taking the world situation too lightly.

Sir Thomas Inskip, Dominion secretary, taking a more optimistic view, asserted that war was unlikely.

The foreign secretary told the house of lords in a foreign affairs debate that "the next few weeks or months may prove critical" and "I cannot encourage anyone to feel complacent about the situation in which the world finds itself."

"I do not think the anxiety is confined to the people in this country," he continued. "It is felt by the people of all countries and therefore we cannot be complacent." It would not be in accordance with the facts and possibilities as we believe them to exist."

But Sir Thomas, addressing a political gathering at Oban, Scotland, said the government had "very good reasons" for believing "war is not likely."

These reasons, he said, were "the growing strength of the nation" and the strength of "the peace front."

Lord Halifax told the peers the government had done everything possible to "strengthen deterrents to war," adding:

"It only remains for us to keep calm, and so far as we may to keep united, to avoid exaggerated attention to rumors and to be neither over-confident nor over-pessimistic."

In a radio broadcast the foreign minister, the foreign secretary said:

1.—Great Britain was prepared to use her good offices "if and when they could be used" to employ them to mediate the Chinese-Japanese conflict.

2.—Continued anti-British agitation in North China could only injure further relations between Britain and Japan "with all the consequences that deterioration must inevitably bring."

3.—The Japanese under the July 22 agreement assumed responsibility for maintaining order in Japanese-controlled areas of China. "The British government will expect them to put down aggression and check anti-Japanese propaganda in those areas."

4.—Britain was watching the Dantzig situation "most closely" and was "fully alive to possible repercussions and developments in that quarter upon the future of European peace."

5.—The main difficulty in concluding a British-French-Soviet-Russian mutual assistance pact was "finding a formula that will be likely to cover indirect aggression without, in any way encroaching on the independence or neutrality of other states."

"It is no secret," Lord Halifax said, "that the proposals the British and French have made have appealed to the Soviet government as insufficiently comprehensive, while the formula favored by the Soviet government has seemed to His Majesty's government and the French government to go too far in the other direction."

Canada's Governor-General

Prince King May Request Second Term For Lord Tweedsmuir

Ottawa.—Indication that efforts will be made to retain Lord Tweedsmuir for a second term as governor-general of Canada was given by Prime Minister Mackenzie King.

The prime minister was asked if any consideration had been given to the selection of a successor to Lord Tweedsmuir, whose five-year term expires next year. "I have been very happy to have Lord Tweedsmuir here and would like to see him stay for another term," the prime minister said. "I would like an extension to his term before I would think about his successor."

A despatch from London said the 44-year-old Duke of Devonshire, son of a former Canadian governor-general, is being spoken of as a possible successor to Lord Tweedsmuir.

Battle With Arabs

Jerusalem.—British troops killed nine Arabs and wounded 20 others in an engagement with a large rebel band south of Bethlehem. Several prisoners were taken. British officers believed the band responsible for killing one British private and wounding four others July 23.

Only Five Questions Asked

London.—The naval air service wants more gunners, and they don't have to be Einsteins. Instead of examinations in mathematics, all they will have to pass is a special "intelligence" test of five questions, none about gunnery.

Strengthen Navy

Britain Will Add 180 New Vessels To Construction Program

London.—Geoffrey Shakespeare, financial secretary to the admiralty, announced in the House of Commons Great Britain would add 180 vessels, mostly smaller craft such as trawlers, to the 1939 naval construction program. The additions, he said, would include 107 trawlers for minesweeping and anti-submarine work. Twenty of these would be specially built and the remainder purchased and converted.

The government also plans to construct 56 vessels of the whale packet type, some for service as packet vessels and others for anti-submarine work.

Other new vessels would include 10 big minelayers, six boom defense vessels and one cable ship.

A floating dock to accommodate small craft up to 5,000 tons already has been purchased, he announced, adding that further additions will be disclosed later and provisions for meeting the cost will be made in a supplement budget estimate.

Mr. Shakespeare estimated the cost of the new vessels at about \$51,000,000.

In reply to a question, he said the main naval building program would continue to be governed by the schedule announced at the beginning of the year.

"We cannot depart from that without breaking the naval treaty of limitation," he said.

Wheat Quota Plan

United States Delegate To Conference Makes Proposal

London.—It was learned that Ray Atherton, the United States delegate to the "Big Four" wheat conference in London, had proposed a five-year international quota on the exportation of wheat from Canada, the United States, Australia and the Argentine.

Under the proposed agreement Canada would export 40 per cent. of the amount.

The "big four" would export 435 million bushels, which is estimated as the yearly world demand. Out of this amount Canada would export 40 per cent., Argentina 23 per cent., the United States 19 per cent., and Australia 18 per cent.

It is understood that Australia and Argentina are demanding a larger quota of the estimated 435 million bushels for 21 per cent. and Argentina seeking 26 per cent.

It was also understood that the chairman of the conference had suggested as a solution of the problem that those countries with large surpluses of wheat be given preference over those whose domestic consumption accounts for the greater share of their production.

This would mean that the United States and Australia would be called upon to renounce the exportation of large amounts of wheat for the benefit of Canada and the Argentine, where surplus stocks are expected to be large.

Britain May Have Election

Prince Minister Chamberlain In Favor Of One This Year

London.—Unless the international situation deteriorates sharply Britain is almost sure to have a general election in November.

Parliament has adjourned until Oct. 3 when it is expected it will sit three weeks before dissolution in preparation for the election.

The Chamberlain government could go into another year before appealing to the people, but Prime Minister Chamberlain favors an election this year unless the international situation interferes.

Police Dog Discovers Lost Man

Halifax.—A police dog used by Royal Canadian Mounted Police of the Royal Halifax detachment found an elderly Spryfield man lost in the woods in the early hours of this morning. Police were notified about 11 a.m. of the disappearance of 76-year-old William MacKenzie. The dog was taken out, given the scent and before midnight the aged man was found.

B.C. Lower Gas Price

Victoria.—British Columbia motorists will be able to buy their gasoline more cheaply after August 7 under an order issued by the provincial government which reduced wholesale prices three cents a gallon and fixed the price spread between wholesale and retail prices.

Russian Pilot Meets Death

Moscow.—Mikhail Alexeoff, Soviet pilot known for altitude flights and recently as a test pilot of military planes, was killed in a performance of his death gave no details.

AIR FORCE LEADER SEES REAL DANGER TO OUR DOMINION

Vancouver.—Air Marshal W. A. Bishop, V.C., said, "There is real danger of a fight ahead of us" and predicted that "if called upon, the new Royal Canadian Air Force will outdo the magnificent record" established in the last war.

The Canadian war ace addressed a luncheon meeting of 500 leading Vancouver citizens under auspices of the Service Club Council on "The Air Defence of Canada."

Speaking of the possibility of a new war, he said: "Canada will be in this fight because she cannot keep out of it. She will be fighting not for the defence of the United Kingdom nor in the general interests of the empire, but for her own survival."

The "absolute guarantee of world peace" the air marshal said, is a "show of overwhelming force" by the United British empire, and development of Canada's air force is the greatest contribution the Dominion can make to the program.

Canada itself was subject to attack. In addition, the Dominion would be the strategic point of attack for an invasion on the United States by a foreign power. "History proves that isolation as a practical policy has been dead more than 20 years."

Referring to expenditures being made for defence, he said that they are designed to bring the Dominion securely into the war.

"To say to-day that for the future, if (defence) is no longer a question of politics, it is no longer a question of race against race . . . it is now the question of the preservation of the most precious thing that has been given this country by the two races that govern it—freedom."

Speaking of the rebuilding of the Canadian Air Force, the air marshal said "wonderful results have been accomplished and new equipment is being received almost daily."

"Canada," he added, "has a tremendous potential reserve of pilots," during the war they appeared like "a bunch of wild animals" since then experienced civilian and military pilots have been produced.

"We need have no fear on this score in case of war or emergency."

In a brief reference to aeroplane manufacturing in Canada, he said: "Many further orders for aircraft we expect will shortly be placed in this country." He did not elaborate on the remark.

Faith For Hitler

London.—Laden with gifts, three English girls who danced before Chancellor Hitler in the Berlin Wittenberg, returned home with pride of the fuhrer's "marvellous eyes," dynamic personality and magnetic attraction for women.

Germany Celebrate

Berlin.—Under orders of Chancellor Hitler the German army celebrated for the first time an anniversary of the outbreak of the Great War.

BEAUTY CONTEST

In the United States to question the supremacy of American beauties are Joyce Claxton (left), "Miss London"; and Andree Lorraine (right), "Miss Paris". They are pictured upon arrival at New York.

DEVELOPS BETTER LIGHT

Mortgage Bank

Western Man, E. M. Johnston, appointed Supervisor

Ottawa.—E. M. Johnston, supervisor of farm mortgages, has been appointed supervisor of the Central Mortgage Bank, it was announced here yesterday.

Mr. Johnston was born and educated in Scotland and came to Canada in 1910. After four years' overseas service he joined the staff of the soldier settlement board in July, 1919. He was appointed assistant district superintendent of the board's Winnipeg office in 1922. Since 1922 and until he became associated with the Central Mortgage Bank, he served as superintendent for the soldier settlement board in Regina, Edmonton and Saskatoon.

"His experience in these positions has given him a comprehensive and intimate knowledge of mortgage conditions and problems affecting western farming," says the brief statement.

Mr. Johnston was born and educated in Scotland and came to Canada in 1910. After four years' overseas service he joined the staff of the soldier settlement board in July, 1919. ALBERTA

A considerable improvement in fishing is reported.

Misses Helen Dutil and Lena Frazer have returned from their motor holiday trip.

Miss Ann Yanota was up from Lethbridge during the week to visit her parents here.

Mr. and Mrs. Hartley Upham, who have been holidaying at Nelson, are due to return home next week.

A meeting of the Elks' carnival committee is to be held tonight at 8 o'clock in Mr. Freeman's office.

Dr. H. B. Hoar returned last week end from a holiday visit to his home in New Brunswick.

Waiter P. Chrysler, automobile manufacturer, lies critically ill at his home in Long Island.

Word comes from Calgary that there is a chance of saving the sight of Mr. Pasty Comiso's injured eye.

Miss Berta Harmer returned to Blairmore on Monday, after having spent a month visiting relatives and friends in Calgary.

George Roy McLean, former newspaper man at Crossfield, has accepted the position of manager of the government treasury branch at Lacombe.

In proposing the toast to Alberta at the big Liberal banquet in Toronto, Hon. J. A. McKinnon said "the people of Alberta were beginning to realize the tragedy of their recent political history."

Mrs. Peter Wasnock and son Ronald returned by Tuesday night's train to Port Angeles, Washington, after an extended visit here with the former's parents, Mr. and Mrs. J. Angus MacDonald.

Mrs. Leonard McDonald, who had been visiting relatives and friends here, left Friday last for Calgary, where she will visit with her mother for a while before returning to her home in Trail.

Mrs. W. Oliver left for Calgary on Wednesday to enter Holy Cross hospital for medical treatment. She was accompanied by Mrs. D. A. Howe and Billy and Thelma, who will spend a few days with relatives there.

Statistics show that there is a partial moratorium on pedestrian deaths in traffic accidents on Sundays, holidays and combination Sunday-holiday week ends. On a regular week day pedestrian deaths make up one third the total killed in traffic accidents, according to the 1939 edition of Accident Facts; but on Sundays and holidays the percentage drops to 27 per cent.

The Cranbrook Sash and Door Company and the B. C. Spruce Mills, Lumberton, have a contract for 60,000 grain doors from the C.P.R. for the handling of the 1939 grain crop.

Miss Caroline Moore, R.N., is leaving Nurse Price at the Stewart hospital. Miss Price is away on holiday and will likely visit the San Francisco world's fair before returning.

A small drink of gasoline is supplied from an automobile carburetor spell; sudden death for Harry Magas, fifteen-month-old son of Mr. and Mrs. Demetro Magas, of New Westminster, British Columbia.

Mr. and Mrs. John Patterson and children are here from Blairmore, spending a holiday and visiting at the home of Mr. Patterson's aunt, Mrs. D. R. McDonald, and son Johnnie - Cranbrook Courier.

Those guys throughout Alberta who have been waiting several years for jobs on the new Aberhart provincial police force are beginning to look more and more worried. May be another breach of promise.

The premier came so close to his own pet constituency the early part of the week that he really appeared to be shivering. It's the nearest he has been to it since he recalled the recall act to save himself.

Mrs. Robert Kerr, of Blairmore, received word last week end of the death of her father, Mr. William Bell, at Irma, Alberta. Mr. and Mrs. Kerr and daughter had just returned from a visit to him, having learned of his illness. They were accompanied on the trip by Mr. and Mrs. S. J. Purdy, of Lundbreck. It was shortly after their return that word of his death was received. The remains were laid to rest at Irma on Saturday last. Mr. Bell is survived by one son and one daughter.

Local and General Items

The Editor will be glad to receive items for this section, regarding visitors, performances, parties, leave for holidays or short trips, bridge parties, teas, showers, presentations, anniversaries, etc. Phone items in to 11 or hand them in at The Enterprise office not later than Thursday evenings.

Mr. and Mrs. Trout announce the birth of a young son - a fingerling.

How on earth can Aberhart deny that taxation has not increased under his regime?

Careful investigation reveals that a telephone pole never hits a motor car except in self defense.

Born at the St. Eugene hospital, Cranbrook, on July 26th, to Mr. and Mrs. Tom S. Beynon, a son.

Mrs. Cyrus Fabro has been a holiday visitor with her sister, Mrs. Alphonse Fabro, at Kimberley.

If some of these agitators would agitate a hoe on the farm, the country would be a lot better off.

Douglas Craig, of the Bank of Commerce staff at Claresholm, has been transferred to the Lethbridge branch.

Practically fifty per cent of all deaths in Canada from diphtheria in the year 1938 occurred in the province of Quebec.

At Vernon, B.C., cow owners who sell their milk direct to the householders have had their licenses increased from \$10 to \$20.

Children be careful of matches.

Mr. Aberhart says that Social Credit is sweeping across Canada like wild fire, but it's not just fire.

Mrs. G. A. Passmore was a visitor to Cranbrook for a few days, having accompanied her grandson George home after an extended visit here.

Mrs. J. O. C. McDonald, of Colemain, had as her guest recently her brother, D. H. MacLean, and Mrs. MacLean, of Stellarton, Nova Scotia.

A large section of concrete sidewalk in front of the old Alberta hotel building caved in on Wednesday night. Fortunately, no one happened to be travelling over it at the time.

The Cranbrook Sash and Door Company and the B. C. Spruce Mills, Lumberton, have a contract for 60,000 grain doors from the C.P.R. for the handling of the 1939 grain crop.

Mr. and Mrs. Benjamin Carter, of Hillcrest, announce the engagement of their youngest daughter, Bessie Ann, to Mr. C. L. Andrew, youngest son of Mr. and Mrs. A. C. Andrew, of Ponoka, Saskatchewan, the wedding to take place shortly. Mr. Andrew has been a member of the Blairmore R.C.M.P. detachment for the past two and a half years.

Recent frosts did considerable damage to Fernie gardens.

Mrs. J. W. Gresham is a visitor with friends in Calgary.

Roy C. Taylor, M.L.A., spent several days in this district during the week.

Tourists travelling through the central States are complaining of rains.

"Nuts Day" is to be celebrated in Alberta shortly. Its history dates back to 1935.

In all his talking these days, Able is careful not to mention the thirteen-year-olds again.

Mrs. Prue Borden, daughter of Dr. and Mrs. R. P. Borden, of Penticton, is a visitor with friends in Calgary.

Lon Cavanaugh is secretary of the Committee of Ten Thousand being organized in Calgary to oppose Aberhart.

William Hutchinson has resigned the post of manager of Hillcrest Collieries, which he has held since the spring of 1938.

"By using the credit houses you can create your own dividends." - Aberhart. Now, blame the credit houses or yourself; the buck is passed.

Mr. Henbest, of Edmonton, practically had the best hen at the world poultry congress at Cleveland, Ohio. He landed first prize in the old English black-red game class.

A Calgary chap, who is keeping company with a school teacher, says that "the care and handling of pets is one of the most popular science activities in the elementary grades." Evidently he is learning something.

Mrs. Davidson and daughter Mary, of Calgary, are house guests of Mr. and Mrs. P. Chardon this week end, enroute to holiday at the coast. Mrs. Davidson was formerly Miss Cogland, former member of the Blairmore teaching staff.

A meeting of Liberals of the Crows' Nest-Pincer Creek provincial constituency is called to take place at the Lundbreck Community hall on Wednesday next, August 16th, at 8 p.m., for the purpose of organizing this new constituency.

Three bond issues amounting to \$28,000,000 will be refunded by the Dominion government this fall, which will bring the public debt refunded this year to \$110,200,000. In May last \$85,000,000 of Canada's debt was refunded and \$50,000,000 of new debt was added in one operation.

Termination of economic relations between Canada and Japan were advocated by Hon. W. D. Herridge, leader of the New Democracy movement, at Ottawa. Pointing out that the United States had denounced their commercial treaty with Japan, Major Herridge said that Canada should do likewise.

The British Columbia government has ordered a reduction of three cents per gallon in wholesale gasoline prices, and fixed the price spread between wholesale and retail prices at five to six cents. Vancouver motorists now buy standard gasoline at 27 cents a gallon, including a seven-cent provincial tax.

The annual provincial track and field meet of the Alberta Branch of the Women's Amateur Athletic Federation of Canada for 1939 will be held at Stettler on Labor Day. The official list of 27 events will be on the programme for senior, intermediate and junior classes. Miss Juanita Lawrence, 9311-104th Avenue, Edmonton, is secretary.

Sam McDowell returned to his post as manager of the local telephone exchange on Monday, following a three-week holiday, during which he was accompanied on a few days' motor trip to U.S. points by his sons, Ernie, bank examiner, of Calgary, and Alex, who is home on leave from the Royal Air Force. B. A. Malone, who relieved Mr. McDowell, returned to Lethbridge over the week end.

The proceeds of a dance to be held at Brooks on August 17th are to be used to help finance the asphalting of the main street there. The use of the theatre for the dance is being granted free by the owner, P. Ubertino.

Upsets the weather! Just as people were sweltering in a 100 degrees above zero heat on Saturday afternoon, "George" came along with his skyscraper coupe, hit the sky, caused an upheaval and then a welcome rain. Atta boy, George!
